

CITY OF FORT LAUDERDALE

IMPORTANT NOTICE!

EDGEWOOD NEIGHBORHOOD STORMWATER IMPROVEMENTS

Traffic advisory

The City of Fort Lauderdale is investing \$14.5 million in the Edgewood neighborhood to reduce flooding, enhance reliability, promote neighborhood sustainability, and improve services.

Crews from David Mancini & Sons, Inc. (DMSI), will be installing approximately 5.6 miles of reinforced concrete pipe, varying in diameter from 15 to 66 inches, with more than 350 concrete structures. The end result will be more efficient stormwater collection and three additional areas for quicker water discharge.

This project began in January 2022 and is expected to be completed by fall 2024. DMSI is planning to start mobilizing on **SW 31 St & SW 32 st between SW 2 Ave and SW 3 Ave** to commence construction the week of June 6, 2022. During construction, detours will be in place, but the road will be open to local traffic. **Attached is a map showing the affect area.**

Also, during construction, the contractor will temporarily restore affected driveways. At the project's completion, the contractor will fully restore all affected areas including landscaping, driveways, sidewalks, curbs, signs, final asphalt and pavement markings.

Please follow posted signs and drive with caution in the area. Thank you for your patience and cooperation as we strive to upgrade the City's infrastructure.
