1. A particle of mass m is confined to a one-dimensional box of length L . The potential energy is zero inside the box and infinite outside. Find the energy levels and wave functions for the ground state and the first two excited states.		
2. A particle of mass m is confined to a two-dimensional rectangular box of length L_x and L_y . The potential energy is zero inside the box and infinite outside. Find the energy levels and wave functions for the ground state and the first two excited states.		
3. A particle of mass m is confined to a three-dimensional rectangular box of length L_x , L_y , and L_z . The potential energy is zero inside the box and infinite outside. Find the energy levels and wave functions for the ground state and the first two excited states.		
4. A particle of mass m is confined to a spherical box of radius R . The potential energy is zero inside the box and infinite outside. Find the energy levels and wave functions for the ground state and the first two excited states.		
5. A particle of mass m is confined to a cylindrical box of length L and radius R . The potential energy is zero inside the box and infinite outside. Find the energy levels and wave functions for the ground state and the first two excited states.		
6. A particle of mass m is confined to a conical box of height L and radius R . The potential energy is zero inside the box and infinite outside. Find the energy levels and wave functions for the ground state and the first two excited states.		
7. A particle of mass m is confined to a hemispherical box of radius R . The potential energy is zero inside the box and infinite outside. Find the energy levels and wave functions for the ground state and the first two excited states.		
8. A particle of mass m is confined to a parabolic box of length L and height H . The potential energy is zero inside the box and infinite outside. Find the energy levels and wave functions for the ground state and the first two excited states.		
9. A particle of mass m is confined to a cubic box of length L . The potential energy is zero inside the box and infinite outside. Find the energy levels and wave functions for the ground state and the first two excited states.		
10. A particle of mass m is confined to a tetrahedral box of length L . The potential energy is zero inside the box and infinite outside. Find the energy levels and wave functions for the ground state and the first two excited states.		
11. A particle of mass m is confined to a pentagonal box of length L . The potential energy is zero inside the box and infinite outside. Find the energy levels and wave functions for the ground state and the first two excited states.		
12. A particle of mass m is confined to a hexagonal box of length L . The potential energy is zero inside the box and infinite outside. Find the energy levels and wave functions for the ground state and the first two excited states.		
13. A particle of mass m is confined to a heptagonal box of length L . The potential energy is zero inside the box and infinite outside. Find the energy levels and wave functions for the ground state and the first two excited states.		
14. A particle of mass m is confined to an octagonal box of length L . The potential energy is zero inside the box and infinite outside. Find the energy levels and wave functions for the ground state and the first two excited states.		
15. A particle of mass m is confined to a nonagonal box of length L . The potential energy is zero inside the box and infinite outside. Find the energy levels and wave functions for the ground state and the first two excited states.		
16. A particle of mass m is confined to a decagonal box of length L . The potential energy is zero inside the box and infinite outside. Find the energy levels and wave functions for the ground state and the first two excited states.		
17. A particle of mass m is confined to an undecagonal box of length L . The potential energy is zero inside the box and infinite outside. Find the energy levels and wave functions for the ground state and the first two excited states.		
18. A particle of mass m is confined to a dodecagonal box of length L . The potential energy is zero inside the box and infinite outside. Find the energy levels and wave functions for the ground state and the first two excited states.		
19. A particle of mass m is confined to a tridecagonal box of length L . The potential energy is zero inside the box and infinite outside. Find the energy levels and wave functions for the ground state and the first two excited states.		
20. A particle of mass m is confined to a tetradecagonal box of length L . The potential energy is zero inside the box and infinite outside. Find the energy levels and wave functions for the ground state and the first two excited states.
