*The recordings will be available to replay.*

The City of Fort Lauderdale has asked the Urban Land Institute (ULI) to convene an independent volunteer Advisory Services panel to analyze flood-prone City roads and recommend criteria for a policy to determine which roads to elevate and how to prioritize and fund these improvements.

You're invited to participate in this process! Share your thoughts and experiences related to roadway inundation during the Listening Session on March 11 and learn about the ULI panel's recommendations during a presentation at the conclusion of their visit.

See a map of the study area, learn more about this initiative, and see the final report this spring at [ftlcity.info/roadelev](https://ftlcity.info/roadelev).
